Esophageal Manometry and 24hr PH Impedence Study

Procedure Date: _____ Time: _____

Location: _____

YOU MAY HAVE TO RETURN 24-48 HOURS LATER; INSTRUCTIONS WILL BE GIVEN TO YOU AT YOUR FIRST INITIAL APPOINTMENT LISTED ABOVE.

When having an Esophageal Manometry, a small tube is placed via the nose to measure PH (Acidic or Alkaine) of the stomach.

Instructions:

- Wear loose comfortable clothes.
- Hold all PPI's (Nexium, Prilosec, etc. ...) 7 days prior to appointment.
- No H2 Blockers (Zantac, Pepcid, etc. ...) 48 hours prior
- No antacids 24 hours prior
- Fast 8 hours prior

IF YOU ARE UNSURE WHETHER OR NOT TO TAKE ANY MEDICATION, PLEASE CALL OUR OFFICE AND DISCUSS WITH THE NURSE
